DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 7, 8, 11, 12, 17, 26, 38, 44, 49, 72-73, and 77-78, drawn to Figure 1 elements 101 and 103 this aspect of the invention relates to an encoding and decoding process of the present invention.

Group II, claim(s) 59-60, 69, 76, and 79, drawn to Figure 1 element 102 this aspect of the invention relates to a restoration process of the present invention.

The inventions listed as Group I-II do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT 13.2, they lack the same or corresponding technical features for the following reasons: the special feature of the Group I invention is an encoding and decoding of a warped wavelet while the special feature of the Group II is the restoration of a warped wavelet. Since the special technical feature of Group I invention is not present in the Group II claims and Group II invention is not present in Group I claims, unity of invention is lacking.

Conclusion

2. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
